-  [muhammedishan1997@gmail.com](mailto:muhammedishan1997@gmail.com)
-  Malappuram, Kerala
-  [github.com/muhammedishank](https://github.com/muhammedishank)
-  [linkedin.com/in/muhammed-ishan-k](https://linkedin.com/in/muhammed-ishan-k)

## SKILLS

- React
- JavaScript
- Node.js
- Express
- MongoDB
- REST APIs
- HTML & CSS
- Material-UI
- Redux

Familiar with

- Figma
- Postman
- GIT
- Firebase
- AWS
- PostgreSQL

## MINI PROJECTS

### User management

React.js, Node.js and MongoDB

 [github.com/User-Management-Using-ReactJs.git](https://github.com/User-Management-Using-ReactJs.git)

### Netflix clone

React.js and TMDB api integration

 [github.com/React-Netflix.git](https://github.com/React-Netflix.git)

## PROFESSIONAL PROFILE

Self-taught MERN Stack developer based in Calicut, Kerala, curious to learn more about developing scalable distributed systems. I love exploring new technologies, solving real-life problems end-to-end, and I have a keen interest in JavaScript, React, NodeJS, Express and a lot more.

## EXPERIENCE

### MERN Stack Developer Trainee

Brototype

03/2022- Present

Kozhikode, Kerala

## EDUCATION

### B.Tech

Government Engineering College Kozhikode

07/2017 - 08/2021

Kozhikode, Kerala, 8.25 CGPA

Mechanical Engineering Degree from APJ

Abdul Kalam Technological University.

## PROJECTS

### Designed an E-Commerce website for purchasing mobile phones

05/2022 - 06/2022

 <https://mcarts.today/>

 [github.com/muhammedishank/M-CART-Ecommerce.git](https://github.com/muhammedishank/M-CART-Ecommerce.git)

Mcart is an E-Commerce website for purchasing smartphones using Node.js, Express, MongoDB and Handlebars. It has two phases, admin and user.

#### Admin :

- Dashboard is with sales report and brand report
- Admin can handle user block, unblock and delete
- Can add product and change product details
- Can add category and sub categories
- Admin can manage order details and product details

#### User :

- Login and signup with OTP verification using twilio
- User can add product to wish list and view single product
- Category wise render of all products
- Product can be searched and filtered
- Payment Gateway is integrated with Razorpay
- User can apply coupon before final billing
- Users can download an invoice of the orders

## Incubation management

React.js, Node.js and MongoDB

🔗 [github.com//React-Incubation-with-Redux.git](https://github.com//React-Incubation-with-Redux.git)

## Todo

React.js

🔗 [github.com/Todo-React-.git](https://github.com/Todo-React-.git)

## Olx clone

React.js and Firebase

🔗 [github.com/React-olx.git](https://github.com/React-olx.git)

## SOFT SKILLS

- Self learner
- Leadership
- Quick Learner
- Project Management

## Technologies used :

- |               |                   |            |
|---------------|-------------------|------------|
| - Nodejs      | - Hbs View engine | - Express  |
| - Multer      | - Bootstrap       | - Ajax     |
| - MongoDB     | - AWS             | - Razorpay |
| - Node mailer | - Twilio          | - MUI      |

## Social Networking site

08/2022 - Present

🔗 [github.com/muhammedishank/social-media.git](https://github.com/muhammedishank/social-media.git)
